

# LICENCE CLASSES

## FIRE PUMPS OCCUPATIONAL LICENCES

### Licence Classes

- (1) Certify.
- (2) Inspect and test

### Scope of work

- (1) For the licence class mentioned in section 1. above — certify, inspect and test fire pumps.
- (2) For the licence class mentioned in section 2. above — inspect and test fire pumps.

### Technical qualifications

- (a) For the licence class mentioned in section 1. above —
  - (i) successful completion of Certificate IV in Fire Systems Compliance (Hydrants, Sprinklers and Pump-Sets) 30536QLD; or
  - (ii) successful completion of a course the authority considers is at least equivalent to the course mentioned in paragraph (a)(i); or
  - (iii) a written statement by Construction Training Queensland, or accreditation from the Fire Protection Industry Board, that the applicant has successfully completed all of the following—
    - category IAS-L1—certification of installation of pressure maintenance fire pump sets;
    - category IAS-L2—certification of installation of fire hose reel pump sets;
    - category IAS-L3—certification of installation of residential fire sprinkler pump sets;
    - category IAS-L4—certification of installation of fire protection pump sets;
    - category MAP-L1—certification of maintenance of pressure maintenance fire pump sets;
    - category MAP-L2—certification of maintenance of pre-assembled fire pump sets;
    - category MAP-L3—certification of maintenance of fire protection pump sets.
- (b) For the licence class mentioned in section 2. above —
  - (i) successful completion of both of the following units of competency—
    - Install Water Pump Set BCPWT3005A;
    - Test Fire Protection Systems for Pressure BCPFS3005A; or
  - (iii) successful completion of a course the authority considers is at least equivalent to the units of competency mentioned in paragraph (b)(i).

### DEFINITIONS

#### Certify means

- (a) to give advice or a report, including a certificate, stating that a fire protection system complies with Australian and international standards, Building Code of Australia requirements and manufacturer’s specifications after conducting a survey of the system; and
- (b) to give a QBSA licensee certificate under the *Building Regulation 2006* for the work.

#### Inspect and test means

- to inspect by visual examination the components of fire protection systems or equipment to establish correct settings, physical condition or fitness for purpose under 1-5-5, AS 1851-2005; and
- (a) to test, after inspecting, by the confirmation of correct function or performance of a component or system under 1-5-13, AS 1851-2005.

### NOTES

- (1) BCPWT3005A and BCPFS3005A are competency units from Certificate 111 in Fire Protection BCP30503
